# concrete

## INDEX Volume 4 1970

Figures in **bold** represent the issue number, which is followed by the relevant page number

### Articles

Absorption of concrete aggregates **9**:367
Acrylic and unsaturated polyester resins as adhesives **1**:21
Addenbrooke's Hospital **4**:132
Admixtures, booklet on **7**:280
Admixtures, science of **2**:81
Aggregates, absorption of concrete **9**:367
Aggregates, concrete **5**:185
Aggregates, effect on cylinder-splitting strength **7**:277, **10**:394
Aggregates, effects of sea-shells in concrete **2**:71, **5**:173
Aggregates, mix design using crushed granite **11**:427
Aggregates, sea-dredged **4**:131
Analysis of fresh concrete, rapid method for the wet **9**:351, **11**:436
Appearance of concrete **7**:305
Architectural concrete **1**:3
Architecture of concrete **5**:177
Are your testing machines and operators good enough to test concrete cubes? **10**:399
Beams and fire, concrete **11**:433
Beams, manufacturing precast prestressed hollow **2**:51
Beams precast by long-line slip-forming **5**:207
Beams, shear strength of bonded and non-bonded reinforced concrete **12**:458
Blocks, recent developments in the use of concrete **9**:355
Bourne Hall, Ewell, Surrey **3**:101
Bridge and concourse at Sheffield University **3**:120
Bridge at Stevenage, railway **9**:369
Bridge cantilever, model test on a prestressed concrete **4**:149
Bridge design, application of finite-element technique in **5**:197
Bridge in Holland, lightweight-concrete **8**:324
Bridge, southern approach to Wandsworth **4**:128
Bridges in Britain, early concrete **9**:363, **10**:394
Bridges 1966-70 **6**:227, **7**:280
Bridges over the River Trent **5**:194
Broader view **1**:2
Building Research Station's advisory service, expansion of **4**:154
Buildings, prestressed concrete in **6**:249
Cement, supply, testing and specification of **8**:335
Cement works, production starts at Northfleet **4**:141
Church at Freiburg **4**:150
Church at Shenley Green, Birmingham **10**:388
Civic Trust Awards 1969 **3**:97
Clifton Bridge **5**:194
Computer building at Wexham Springs **7**:297
Computer centre at Leeds **1**:32
The Concrete Society Award 1970 **7**:281
The Concrete Society's third annual convention **7**:295, **8**:328
Concrete, the material **7**:295, **8**:328
Corrections **2**:65, **7**:281
Corrosion, resistance of reinforcement to **10**:383
County and municipal buildings at Paisley **3**:90
Cracking up the cube **11**:435
Cylinder-splitting strength, effect of aggregates on **7**:277, **10**:394
Dams, concrete for large **10**:395
Deformed bars in concrete **7**:306
Design of concrete structures for creep, shrinkage and temperature change **12**:451
Design of structures to withstand gaseous explosions **2**:62, **3**:107, **5**:175
Design, some thoughts on engineering **1**:22, **2**:56, **3**:95, **4**:135, **8**:319, **10**:393
Designer's role **4**:137, **5**:174
Docks, redeveloping St Katherine **2**:65
Drawing procedures, automated **6**:221
East Midlands, a review of the concrete industry in the **5**:176
Epoxy resins and their uses in concrete **1**:16
Exhibition at the ICE **8**:323
Explosions, design of structures to withstand gaseous **2**:62, **3**:107, **5**:175
Falsework, draft report on **3**:95
Fifth amendment to the Building Regulations, interpreting the **6**:216, **7**:275, **7**:280
Finite-element technique in bridge design **5**:197
FIP congress at Prague **8**:314
Fire, concrete beams and **11**:433
Fire, investigation of structural damage by **3**:104, **5**:174
Five pounds per square inch and all that **7**:280
Formwork, special steel **2**:53
Freezing, storage of samples of fresh concrete by rapid **7**:309
Grandstand at Leopardstown Racecourse, Dublin **10**:376
Ground anchors, developments in **8**:326
Ground engineering: ICE symposium **8**:331
Handling and placing concrete **1**:38

High-strength concrete **2**:83
Highways Research Board USA, annual meeting of **4**:154
Holmes, I. L. **10**:392
Hospital, Addenbrooke's **4**:132
Investigation of structural damage by fire **3**:104, **5**:174
Jacking a two-lane road tunnel under a railway **8**:320
Joints for precast concrete components **3**:105
Kirkham, R. H. H. **6**:218
Kirkwood Dodds scholarship **10**:382
Large-panel construction in a London borough **12**:443
Large-panel construction, strengthening tower blocks of **4**:142, **6**:219
Library and social centre at Ewell, Surrey **3**:101
Lightweight-concrete bridge in Holland **8**:324
Lightweight concrete, true cost of structural **12**:459
Llyn Brianne Dam, sealing the rock surface beneath **8**:332
Manufacture of precast planking units **7**:304
Manufacturing precast prestressed hollow beams **2**:51
Masonry, concrete **4**:144
Masonry in New Zealand, concrete **9**:355
Masonry, prestressed concrete **9**:356
Masonry, rational structural design of reinforced **9**:358
Mersey grit, mix design using **11**:431
Midland Links Motorway **7**:299
Mix design using crushed granite granite **11**:427
Mix design using Mersey grit **11**:431
Model test on a prestressed concrete bridge cantilever **4**:149
Motorway, Midland Links **7**:299
Municipal and county buildings at Paisley **3**:90
Non-destructive testing **11**:435
Northfleet cement works **4**:141
Obituaries **6**:218, **10**:392
Obituary of a pioneer : the coaster S S Armistice **2**:59
Office building in Brisbane **11**:421
Paddington maintenance depot **2**:65
Performance of existing testing machines **9**:347, **10**:399, **11**:435
Placing and handling concrete **1**:38
Planking units, manufacture of precast **7**:304
Planning a new city and replanning an old one **1**:39
Plastic concrete **4**:155
Plastics in concrete technology **1**:12, **2**:57
Polyester resins as adhesives, unsaturated **1**:21
Polymers in cement compositions, organic **1**:14
Power stations, 2,000MW **5**:190
Prague, a British exhibitor at **6**:218
Prague, FIP congress at **8**:314
Precast prestressed concrete : 27 years of production **5**:205
Precasting works **5**:202
Prefabricated floor structure **2**:65
Prestressed concrete in Britain **6**:225
Prestressed concrete masonry **9**:356
Prestressed concrete, the potential of **6**:265
Prestressing, bibliography of British research **6**:270
Prestressing equipment, British **6**:267
Prestressing, other applications of **6**:260
Prince Philip, message from **6**:226
Pumping concrete **1**:10, **2**:56, **5**:173, **12**:464
Punching-shear tests, a new evaluation of **12**:448
Quarries, Tunstead and Elvaston **5**:187
Railway track system, development of a paved **5**:201
Ready-mixed concrete in Europe **4**:158
Reinforcement, resistance to corrosion of **10**:383
Reinforcement supplies **9**:354
Reinforcing steel, why it is in short supply **2**:80
Research : a help or a hindrance ? **3**:117
Resins, epoxy **1**:16
Resins, unsaturated polyester **1**:21
Road construction in Denmark **2**:58
Road without reinforcement, constructing a concrete **7**:273
Roads, constructing concrete **5**:182, **7**:277
Sea-dredged aggregate **4**:131
Sea-shells in concrete aggregates, effects of **2**:71, **5**:173
Sealing the rock surface beneath Llyn Brianne Dam **8**:332
Shear strength of bonded and non-bonded reinforced concrete beams **12**:458
Ship, concrete : the coaster SS Armistice **2**:59
Slab design and the draft unified code **2**:69
Slabs, yield-line analysis of uniformly-loaded triangular **10**:389
Slip-form precasting of floor beams, long-line **5**:207
Space between, the **12**:453
St Albert's Church, Freiburg **4**:150
St David's Church, Shenley Green, Birmingham **10**:388
Steel formwork, special **2**:53
Stephens, J. H. **11**:435
Storage of samples of fresh concrete by rapid freezing **7**:309
Strengthening tower blocks of large-panel construction **4**:142, **6**:219
Synagogue at Haifa, Israel **5**:169
Testing concrete **6**:223
Testing concrete in place, an American method of **3**:119
Testing concrete, standard methods of **4**:134
Testing machines, performance of existing **9**:347, **10**:399, **11**:435
Traffic loading, failure of concrete under repeated **10**:403
Training in the technology of concrete **4**:148
Tunnel, jacking a two-lane road **8**:320
Tunnel, lining the Thames cable **2**:52
Turner, K. Morris **10**:392
Unified code, background and purposes of the new **2**:66
Unified code, concrete and the draft **3**:118
Unified code, discussion on the **2**:68
Unified code, slab design and the **2**:69
Victoria Centre, Nottingham **5**:203
Wandsworth Bridge, Southern Approach **4**:128
Water-containing structures, limit-state theory for **11**:417
Western Bank Bridge and concourse at Sheffield University **3**:120
What's in it for me ? **11**:426
Yield-line analysis of uniformly-loaded triangular slabs **10**:389

Witchlow, A. : Plastics in concrete technology **1**:12

## The Concrete Society

Note : Meetings, symposia, etc., held by the Concrete Society are indexed in the general alphabetical list.

The appearance of concrete **2**:85
The award dinner **8**:339
BSI committee on farm buildings **8**:342
The committee structure of the Concrete Society **5**:211
Construction and formwork divisional committee **1**:42
Constructors guide to formwork **5**:212
The development of precast concrete : students day at Sheffield **1**:44
Divisional sub-committees and working parties **1**:41
Draft report on falsework **2**:85
East Midlands Committee 1966 to 1970 **5**:209
Education in structural fire protection **8**:342
Form and imagination in concrete **5**:211
Formwork methods—is the choice yours ? **5**:212
The guest speaker at the convention **5**:209
Let's give it a bit of environment **2**:85
Members of Council 1970-71 **8**:340
Membership of principal committees **10**:409
New honorary members **11**:426
Non-destructive testing **5**:212
The President 1970-71 **8**:339
The Society's Honorary Members **8**:341
Standardizing coffered and ribbed slabs **5**:212
Storage of liquified natural gases **1**:42
Symbol for letter heading **1**:42
Two technical papers **2**:85
Visit to Frankfurt **11**:432
Visit to Japan **5**:212
Working parties **2**:85

## Correspondence

British Standard 4486 **4**:136, **6**:219
Building regulations **2**:57
The choice of metric units **7**:275
Computer-aided design and detailing **8**:319
Concrete in marine structures **1**:27
The curing of concrete pavement slabs in hot weather **9**:368
The design of structures to withstand gaseous explosions **5**:175
The designer's role **5**:174
Early concrete bridges **10**:394
Effect of aggregates on cylinder-splitting strength of concrete **10**:394
The effects of sea-shells in concrete aggregates **5**:173
Experimental road at Winthorpe **7**:277
Interpreting the fifth amendment to the Building Regulations **7**:275
An investigation of structural damage by fire **5**:174
Joints for precast concrete components **4**:136
Metric sizes of reinforcing bars **4**:136, **5**:175, **8**:319, **10**:393
Metric units and advertisements **1**:27
Metric units and the Newton **1**:27, **2**:57
Miraculous substance **7**:277
Plastics in concrete technology **2**:57
Pumping concrete **2**:56, **5**:173
Restrictions on the use of aggregates in water-retaining structures **11**:415
720lb/ft² (sic) and all that **9**:368
Some thoughts on engineering design **2**:56, **3**:95, **4**:135, **8**:319, **10**:393, **12**:441
Strengthening tower blocks of large-panel construction **6**:219
A testing time for designers **6**:220
Ventilation building at Blackwall Tunnel **4**:135
Water gain and its effects on concrete **3**:96
Why precast concrete ? **1**:27

## Publications

Addendum to Technical Report TRA/398 by N. F. Somes **7**:293
The analysis and design of rectangular concrete slabs with various boundary conditions by R. E. Rowe, T. Jarosz and W. G. Batchelor **11**:438
An application of operational research to concrete road construction by A. A. Lilley **1**:31
Bauingenieur-Praxis, Vol. 46 : Traglastverfahren und Formanderung der Stahlbetontragwerke by W. Wrycza **12**:463
Betonfahrbahnen **1**:29
BPCF data sheets **2**:55, **9**:362
Concrete technology and practice by W. H. Taylor **7**:292
The construction and testing of a one-sixteenth scale model for the prestressed concrete superstructure of section 5, Western Avenue Extension by R. A. Swann **11**:438

Cracking caused by early thermal movements in a reinforced concrete member by A. W. Beeby **1**:31

The curing of concrete pavements in hot weather by J. G. Hunt **7**:293

Design sheets for loading on formwork **2**:55

The development of an air-entraining-agent dispenser for use with small concrete mixers by C. G. F. Baker **7**:294

Deviations in the location of reinforcement by A. Johansson and B. Warris **1**:29

Durchlauftrager—Schnitt Grossen by E. Zellerer **2**:54

Early trafficking of thin concrete patches by I. E. Lancaster **2**:55

The effect of sulphates in colliery shale on its use in roadmaking by P. T. Sherwood and M. D. Ryley **12**:462

Evaluation of construction control procedures **7**:292

The expansion of timber joint-fillers in freshly-placed concrete pavements by J. Weaver **7**:293

An experimental concrete road 38 years old. Condition and performance of sections of the A.316 Great Chertsey Road by J. M. Gregory **12**:462

Flexural strength of corners of reinforced concrete portal frames by R. A. Swann **7**:293

Foundations and concrete work by E. Dobson **12**:464

The full-scale reinforced concrete experiment on the Grantham By-pass. Performance during the first six years by J. R. Nowak **12**:462

Full-scale testing of New York World's Fair structures **1**:28

Further tests to determine shear stresses in reinforced concrete beams by H. P. J. Taylor **7**:294

Ground floors for small buildings **7**:294

Handbook on sealants and admixtures **9**:362

Horizontal forces on bridge expansion joints due to vehicles by W. Black and D. S. Moss **2**:55

Impurities in aggregates for concrete **7**:294

The influence of materials and mix design on the skid resistance value and textural depth of concrete by D. E. Weller and D. P. Maynard **10**:381

International recommendations for the design and construction of concrete structures **10**:379

An introduction to lightweight concrete **11**:438

Investigation of the dowel shear forces carried by the tensile steel in reinforced concrete beams by H. P. J. Taylor **7**:293

Linear elastic analysis by by D. G. Elms **12**:463

Load tests on Smallbrook Ringway Birmingham by G. Somerville **1**:31

Matrix and digital computer methods in structural analysis by W. M. Jenkins **2**:55

Measurement of the tensile strength of concrete by an indirect method: the cylinder-splitting test by D. C. Spooner **1**:31

A method of laying low voltage heating elements in a bridge surface by P. J. Williamson **2**:55

Methods of testing concrete **4**:134

Methods of texturing new concrete road surfaces to provide adequate skidding resistance by D. E. Weller and D. P. Maynard **10**:381

1969 Concrete Year Book **1**:30

Notes on the specification of concrete mixes for housing estate roads **1**:30

137 tests on large panel construction **9**:362

The performance of roads with soil cement bases by M. J. Wright **1**:31

Performance specification writing for building components **2**:54

Prestressed concrete by N. Khachaturian and G. Gurfinkel **7**:292

The properties of cement paste compacted under high pressure by C. D. Lawrence **2**:54

The properties of high strength concrete by L. J. Parrott **1**:31

A proving device for concrete cube testing machines by P. Foote **11**:438

Publications 29-1 of the International Association for Bridge and Structural Engineering **1**:30

Recommended practice for circular concrete storage structures **1**:29

Reinforced concrete detailer's manual by B. Boughton **1**:28

Reinforcement bar data: areas and weights in British, British/metric and metric units by J. Rygol **1**:29

Review of literature related to the analysis and design of thin-walled beams by B. I. Maisel **11**:438

A review of the low-speed skidding resistance of a number of concrete roads containing various aggregates by D. E. Weller **10**:381

A second crack and condition survey of 6in unreinforced concrete roads on two housing estates in the Borough of Worthing by S. J. Martin **1**:31

The selection of constituents and proportions for producing workable concrete with a compressive cube strength of 80 to 100N/mm² (11,600 to 15,900lbf/in²) by L. J. Parrott **1**:31

A series of long-term tests to investigate the deflection of a representative precast concrete floor component by M. R. Hollington **11**:438

Shear provisions for prestressed concrete in the draft unified code by G. C. Reynolds **7**:294

The significance of concrete cube tests by P. E. Halstead **1**:31

Slab design handbook **12**:463

The strength of half-joints in reinforced concrete beams by G. C. Reynolds **1**:31

Structural analysis—influence coefficient method by R. K. Sarker **11**:437

Structures by W. T. Marshall and H. M. Nelson **7**:292

A tentative design method for the composite action of heavily loaded brick panel walls supported on reinforced concrete beams by R. H. Wood and L. G. Simms **1**:28

Terrazzo finishes **1**:30

Tests on a one-ninth scale model of a transverse section of the West Gate Bridge, Melbourne by H. P. J. Taylor and S. W. Clements **1**:31, **4**:149

Tests on reinforced concrete frames. 2: Portal frames with fixed feet by W. B. Cranston and J. A. Cracknell **2**:54

Ultimate strength design handbook. Volume 2: columns **11**:437

The use of an accelerated wear machine to examine the skidding resistance of concrete surfaces by D. E. Weller and D. P. Maynard **10**:381

The use of cement-stabilized chalk in road construction by R. G. Pocock **11**:437

White concrete with some notes on black concrete by J. Gilchrist Wilson **1**:30

Why use admixtures in concrete? **7**:280
